

Tabletop Exercise

Red River Bank
April 10th, 2026

Agenda

- Welcome & Introductions
- About Business Continuity
- About Tabletop Exercises
- The Learning Exercise
- After-Action Discussion

Agility Facilitator

Matthew Barnes

Recovery Manager
College Station, Texas

What Is Business Continuity and Why It Matters

Typical hits to prepare for:

- ✓ Cyberattacks
- ✓ Natural Disasters
- ✓ Utility Failures
- ✓ System Crashes
- ✓ Your best person quitting at the worst time

The Business Continuity Lifecycle

Core Elements of a Tough-as-Nails BCP

“When the lights go out, you don’t want a binder collecting dust. You want a *plan that works*. That’s what we’re building today.”

What every championship-level BCP includes:

- ✓ **Protect your people**
- ✓ **Defined roles and responsibilities**
- ✓ **Crisis communications**
- ✓ **IT continuity**
- ✓ **Access to critical business tools**
- ✓ **Document everything**
- ✓ **Test often**
- ✓ **Keep it current**

Why We Run These Tabletop Exercises

Why this matters:

- Builds muscle memory
- Reveals the cracks
- Tests your RTOs & RPOs
- Makes the chaos familiar
- Strengthens decision-making under stress
- Drives continuous improvement

Ground Rules for the Exercise

Here's how it goes:

- Training and learning exercise
- No trick questions
- Speak from your *real role*
- Stay in the moment
- Push for multiple solutions
- What you give is what you get

This isn't about *looking* good. It's about ***being*** good when it counts.

Objectives: What We're Here to Build

This exercise is designed to sharpen:

- **Coordination**
- **Communication**
- **Decision-making**

Phishing Ransomware

Team Check-In: Let's Kick Things Off

Icebreaker

- How do you keep track of your passwords at home, and how does that differ from work?

Fast Facts

- Phishing is the most common form of cyber crime, with an estimated 3.4 billion spam emails sent every day.
- Approximately \$813 Million was spent on ransomware payments in 2024.
- Ransomware is predicted to cost victims around \$275 billion annually by 2031.

The Exercise Begins

The Incident Begins

Tuesday 8:10am

- Multiple employees receive a phishing email that appears to be from Microsoft.
- It includes a link to a fake Microsoft login and prompts the employee to log in using their network credentials.
- One employee unknowingly follows the link and enters their credentials, closing out of the browser when the page doesn't load.

Based on This Information:

- Multiple employees receive a phishing email that appears to be from Microsoft.
- It includes a link to a fake Microsoft login and prompts the employee to log in using their network credentials.
- One employee unknowingly follows the link and enters their credentials, closing out of the browser when the page doesn't load.

Discussion

- What training or resources are available to employees to help them recognize and respond to phishing attempts?
- How often is a “phishing” test executed with the staff? Is every employee included?
- How are the suspected phishing attempts being reported?
- Who is monitoring any activity that may have been initiated by the real phishes?
- Do you have an Incident Action Plan for this type of event?

Event Continues

Wednesday 8:15am

- Attackers begin their silent attack and use the credentials to access Red River Bank's network.
- Malware is silently deployed across shared drives.
- Some employees experience slight system slowness but do not report it.
- The IT team notices unusual network activity but cannot pinpoint the source.

Based on This Information:

- Attackers begin their silent attack and use the credentials to access Red River Bank's network.
- Malware is silently deployed across shared drives.
- Some employees experience slight system slowness but do not report it.
- The IT team notices unusual network activity but cannot pinpoint the source.

Discussion

- How can employees be encouraged to report system slowness or other anomalies promptly?
- What scans and monitoring does your IT department regularly perform?
- What steps should the IT team follow to report this incident?
- Is this documented?
- What level of management is notified at this point?

Event Continues

Wednesday 11:13am

- The malware has spread and the attackers gain access to sensitive financial records and customer data.
- 1 Employee reports that their computer has rebooted itself
- More employees are reporting that shared files are not opening, and many folders have become completely inaccessible

Based on This Information:

- The malware has spread and the attackers gain access to sensitive financial records and customer data.
- 1 Employee reports that their computer has rebooted itself
- More employees are reporting that shared files are not opening, and many folders have become completely inaccessible

Discussion

- What actions are now being taken by the IT Department?
- How is your crisis management team involved?
- What internal communication is happening with employees?
- What is the Operational plan? Is there a written procedure on how to proceed?

Event Continues

Wednesday 11:45pm

- On a Wednesday night, ransomware is triggered, encrypting critical systems.
- Teller systems and ATM controls become locked and inaccessible.
- Customer loan documents and financial records are encrypted.

Event Continues

Thursday 8:30am

- Users are now reporting that they can not open any programs on their computers
- A message appears on ALL user screens explaining what is going on –
- The attackers are demanding \$3 million dollars in cryptocurrency in the next 48 hours, or they will begin releasing information on the web

22

Ransom

- The attackers are demanding \$3 million dollars in cryptocurrency in the next 48 hours, or they will begin releasing information on the web

Discussion

- With all that is happening - Phishing emails & Ransomware:
 - ✓ Who is overseeing the overall situation right now?
 - ✓ How should the company respond to the demand for \$3 million in cryptocurrency?
 - ✓ Do you have a cyber insurance policy that covers this?
 - ✓ How does the Credit Union continue a sense of “normal operations”?
 - ✓ What type of internal communication is happening?
 - ✓ Is there a need to notify people outside of the company (members, vendors?)
 - ✓ Who oversees that communication?

Event Continues

Friday 10:15am

- Media has learned of the Ransomware attack and reports the story on their morning newscast
- Clients are calling in with questions about their accounts and loans

Based on This Information:

- Media has learned of the Ransomware attack and reports the story on their morning newscast
- Clients are calling in with questions about their accounts and loans

Discussion

- Are there any concerns internally that the attack was leaked to the press?
- Is there training or talk tracks in place for employees? Who is responsible for managing this?
- Who has the ultimate authority to make the decision on what the response will be?

Let's Wrap It Up

You have been a victim of a severe incident

- Talk through the response plan on all levels:
 - The Who
 - The What
 - The How

Review

How Did You Do?

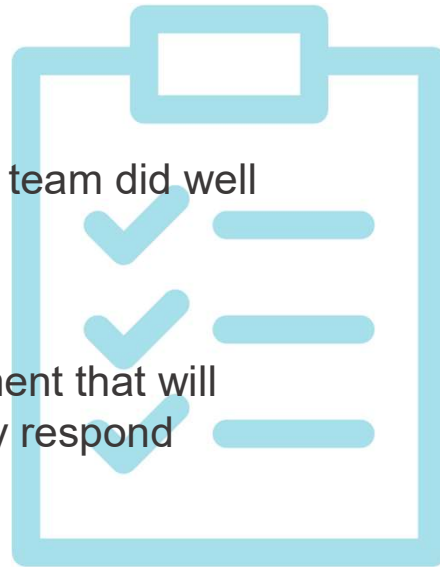

Remember the objectives:

- ✓ Coordination
- ✓ Communications
- ✓ Decision-making

After Action

- ✓ List at least three things that the team did well during this exercise
- ✓ List any gaps you recognized
- ✓ List three action items to implement that will improve your ability to effectively respond
