

claw.9xc.io (Main Host)

OS	Linux 6.8.0-107-generic
Uptime	6d 23h 16m
Load Avg	0.41 / 0.54 / 0.44
CPU	Intel Xeon E5-2680 v4 (8C/8T @ 2.4GHz)
Memory	1.6G / 7.8G used (21%)
Swap	2.2M / 4.0G (negligible)
Disk (/)	20G / 124G (17%)
Disk (projects)	528M / 2.0T (1%)
Network	16 estab / 33 total
Top Process	openclaw-gateway (53.9% CPU, 12.4% mem)

node2 (GPU / llama.cpp)

Proxmox VM	VM 101 — running
Uptime	20 minutes
Load Avg	0.52 / 0.49 / 0.47
CPU	2× Xeon E5-2680 v4 (56C/112T)
Memory	5.5G / 62G used (9%)
Swap	0B / 8.0G
Disk (/)	168G / 249G (71%)
GPU 1	Quadro P6000 24GB (2.4G/24.6G free, 74°C)
GPU 2	Quadro P6000 24GB (5.0G/24.6G free, 68°C)
llama-server	running (CUDA, port 11434)

node1 (Proxmox VM 100)

Status	STOPPED
SSH	Connection timed out
Proxmox	pve-manager/9.1.7 (kernel 6.17.2)
Config	100.conf missing

⚠ VM 100 (node1) is stopped. SSH unreachable. Config file may need recreation.

Services

Service	Host	Status
openclaw-gateway	claw	running
ssh	claw	running
tailscaled	claw	running
gpu-util-sampler	claw	running
realtime-dashboard	claw	active
llama-server	node2	running
gog-bridge	claw	— (port 18790)
n8n	claw	— not found
ollama	claw	not running
node1 VM	proxmox	stopped

Notes & Recommendations

Item	Detail
node1 VM	⚠ Stopped — SSH timed out. Config file 100.conf missing on Proxmox. Needs attention if node1 is required.
n8n / ollama	⚠ Not installed/running on claw host. May need setup or reconfiguration.
node2 disk	⚠ 71% disk usage (168G/249G). Monitor — consider cleanup before it hits 85%+.
node2 GPU	✓ Both Quadro P6000 healthy. GPU 1 at 74°C, GPU 2 at 68°C. llama-server using CUDA on GPU 1.
claw memory	✓ Healthy — 6.1G available of 7.8G total. Swap virtually unused.
uptime	✓ Claw host up 6d23h. node2 rebooted ~20 min ago (likely maintenance).
